PRE-PROGRAMMED SINGLE CHARACTER PACKAGES

- Each Entertainer features approximately eighteen separate movements.
- Appropriately sized sets, such as the columned front porch of Colonel Beauregard's southern mansion, or an airy turn-of-the-century gazebo for Daniel, are available.
- Each Entertainer comes complete with his own musical instrument. In Daniel's case, his own prop piano.
- The audio package features your character as lead singer, instrumentalist, host and storyteller, backed by a full (invisible) band. These shows can be tailored specifically to include references to your restaurant, town, state, menu, etc.
- A live or in-house tape programming option is also available, featuring our exclusive Auto-Vox mouth movement. This option enables you to extend greetings to special groups or individuals, wish your customers a "Merry Christmas" or even ask someone to move their car simply by either operating the character live, or activating a cassette tape which you have pre-recorded and programmed yourself.
- Many restaurants utilize their Entertainers as spokespersons for television commercials, a simple task with the re-programming option.

Hard Equipment Included:
